SUMMARY

Program Manager with 5+ years of experience delivering capital projects and manufacturing improvement programs. Skilled in project execution, portfolio governance, and cross-functional leadership, managing an $18M project portfolio and delivering $12M+ in validated savings.

SKILLS

Project & Portfolio Management: Capital Project Delivery, Portfolio Governance, Project Controls, Scope & Schedule Management, CAPEX Planning, Budget Management, Risk & Issue Management, Stage-Gate Reviews, Change Control, Executive Reporting

Financial & Commercial Management: Capital Investment Planning, Business Case Development, ROI Analysis, Cost Tracking, Budget Reviews, Benefits Realization, Procurement, Vendor & Contractor Management

Engineering & Project Execution: Equipment Installation, Factory Acceptance Testing (FAT), Commissioning, Process Validation, Maintenance & Reliability, Operational Handover, MEP Systems, RFIs, Change Orders

Quality & Continuous Improvement: Lean Six Sigma, DMAIC, Root Cause Analysis, FMEA/PFMEA, Statistical Process Control (SPC), Nonconformance Resolution, Corrective Actions, OEE, KPI Management, ISO 9001

Systems & Tools: MS Project, Smartsheet, SAP, IBM Maximo (CMMS), Power BI, Excel, AutoCAD, SolidWorks, CATIA, Revit

WORK EXPERIENCE

Program Manager - Manufacturing & Continuous Improvement | Perdue Farms June 24 – July 26

- Developed capital approval packages for an $18M portfolio across two plants through CAPEX business cases, ROI modeling, cost estimates, and executive investment reviews.
- Improved on-time project milestones from 85% to 95% by establishing stage-gate governance, Power BI portfolio visibility, risk registers, and weekly and biweekly risk-mitigation reviews.
- Governed a $7.2M high-speed equipment installation, delivering $900K in reported annual savings through vendor coordination, budget reviews, milestone tracking, and commissioning readiness.
- Delivered $10.8M in annualized savings across two plants through cross-functional Lean programs, labor optimization, and process improvements.
- Developed and led the reliability improvement roadmap, increasing PM compliance by 16% and reducing emergency interventions by 18%.
- Improved first-pass product quality to 98% and reduced rework by 12% through FMEA, SPC, DMAIC investigations, process validation, and standardized quality controls.
- Supported a reduction in Total Recordable Incident Rate (TRIR) from 0.8 to 0.5 by partnering with EHS and Operations to deploy forklift proximity detection, revised SOPs, and standardize safety controls.

Project Lead | Cornerstone Building Brands **Jan 24 – June 24**

- Increased production throughput by 23% by coordinating a $790K production-line upgrade through equipment procurement, PLC automation, installation, process validation, and operational handover.
- Improved project schedule adherence by 18% by tracking engineering milestones, supplier lead times, equipment deliveries, and installation dependencies.
- Improved equipment OEE by 6% within 60 days through commissioning troubleshooting, equipment debugging, and corrective-action closure with maintenance teams and suppliers.
- Generated $120K in annual savings by reducing scrap by 8% and cycle time by 12% through Kanban, SMED, material-flow redesign, and standardized work.

Project & Operations Coordinator | University of Maryland, Baltimore County **Oct 21 – May 23**

- Supported execution of $100K+ operational projects by coordinating vendor activities, procurement workflows, and project schedules.
- Coordinated project closeout by tracking costs, validating scope completion, and supporting operational reporting.
- Streamlined daily operations by coordinating service requests, vendor support, and resource scheduling to resolve issues and maintain service continuity.

Project Engineer | Canara Engineering Enterprises **Jan 20 – June 21**

- Coordinated a $770K turbine-vane manufacturing project through mechanical design reviews, DFM analysis, engineering drawings, BOM verification, and supplier coordination.
- Reduced manufacturing nonconformances by 12% through GD&T, tolerance analysis, dimensional inspection, CMM validation, first-article inspection, and ISO 9001-aligned quality controls.
- Accelerated technical handover by three weeks on a six-month project through supplier readiness, factory acceptance testing (FAT), commissioning coordination, and engineering issue resolution.

CERTIFICATIONS

- PMP - Project Management Institute
- Lean Six Sigma Black Belt - Council of Six Sigma Certification
- Supply Chain Logistics - Rutgers University

EDUCATION

M.S. In Engineering Management University of Maryland Baltimore County, 23

B.E. in Mechanical Engineering VTU, 20
